

Irrigation Water Meter

Meter set fee- (includes water meter, check valve and labor)

	550.00
Bull head tie in (includes parts and labor to install)	150.00
C.S.I. (Customer service inspection)	35.00
Deposit (Residential)	<u>120.00</u>
Total	855.00

This is the cost to have another water meter set for the purpose of irrigating the yard only. The irrigation meter does not have a trash bill or sewer bill associated with it. Minimum water bill is 22.95 plus applicable taxes and fees and will increase as the amount of water used increases. A water bill will be mailed out each month even if the irrigation system has not been used.

The irrigation meter is a separate account from the water meter for your house and will be billed separately from your normal water bill.

It is the homeowner's responsibility to have a licensed plumber connect the new irrigation meter to the existing irrigation system, after the new meter is set.

Please contact City Hall at 903-894-7223 ext.101 to get service started or if you have any questions on getting a separate water meter set for your irrigating needs.
