

Ella/Rather Drainage Project

The City of Bullard is currently working on a drainage project at the intersection of Ella Street and Rather Street. Public Works Director David Hortman stated, "Drainage issues are being fixed with new culverts that are being installed and ditches dug. This will also help to keep the water from running along the edges of the road, which in turn cause road damage." City Engineer Brian Capps is estimating about three weeks left on the project. "We have concrete to pour this week, then we'll let that cure. We'll regrade the ditches, take care of seeding and pavement work [in that timeframe]."
